OUR WORK IS BACKED BY

AI TRANSFORMATION

THE FIRST OPERATING SYSTEMS RAN COMPUTERS. OURS RUN COMPANIES.

The blueprint for an AI-first operation: engineers and business partners embed with your team, understand your operations, and deliver the plan. Estimated financial uplift, strategically scoped human and AI interactions, and a clearly mapped timeline.

We build the operating system that runs your business. AI handles the scheduling, the close, the procurement, and the reporting. The work your team used to do manually. Custom software, shipped in weeks, on our platform.

The scheduler that used to build schedules now approves the ones the AI proposes. The controller that used to close the books now reviews the close the AI ran. Faster results, without the slog.

A NEW ERA

There are two kinds of service businesses now: the ones being transformed around AI and the ones being replaced by it.

We do the transformation.

We are engineers. We build AI-native operating systems. Software that operates the business while the team operates the software. We ship in weeks because we've built the platform that makes it possible: proprietary LLMs, virtual playbooks, production infrastructure. Every deployment makes the next one faster.

Our customers are the service businesses that compose the real economy and the investors behind them. We're entering a new productivity golden age, measuring progress through EBITDA, hours returned, and decisions made correctly at scale.

SYSTEMS, NOT TOOLS

DESIGNED TO RUN CORE OPERATIONS FROM ONE INTELLIGENT FOUNDATION.

01 AI OPERATING SYSTEM

A purpose-built operating system that unifies the patchwork of ERPs, spreadsheets, and disconnected point solutions most industrial businesses run on. Every workflow, from project management, financials, CRM, AP/AR, to reporting, is built to mirror how the business actually operates, unified in a single system that compounds in value as the business grows.

02 SCHEDULING

03 VENDOR MANAGEMENT

04 CUSTOMER ORDER EXPEDITING

OUR TEAM

WE'RE AI EXPERTS FROM THE WORLD'S LEADING ORGANIZATIONS

TESTIMONIALS

WHAT OUR PARTNERS SAY

“

What sets Ciridae apart is how fast they think and how fast they build. Their technical capabilities are legitimately impressive. Not just impressive for an AI startup, just impressive full stop. They feel less like a vendor and more like a true transformation partner genuinely invested in driving value.

ATOM

JARRO HILL

CHIEF OPERATING OFFICER OF ATOM

“

Ciridae's system isn't just transformational for us, it's revolutionary.
